

CARD READINGS

This reading is very similar to psychic counselling but uses cards to assist in the process. Karen uses mermaid and dolphin cards alongside fairy cards for this end.

This uses a very simple layout with just 4 to 6 cards out of each pack being used. This uses a combination of the card and the intuitive ability of the psychic to give you a whole range of information.

This reading focuses on events in the past, then current, followed by future possibilities. This is often a very positive process in which the past and present have an effect upon the future predictions.

The purpose of this sort of reading is to be productive, helping to you get your life back on track and looking at possible outcomes. It should leave you feeling positive and looking forward to the future.

“This reading was so accurate, it was scary how you managed to know me inside out in the space of a few minutes”

“Thank you for helping me to see things so much clearer. I now know that what I doing is right and makes so much sense.”
