

SPIRITUAL HEALING

Spiritual healing is a natural form of complimentary healing used in conjunction with conventional medicine. The healer attunes to the spiritual healing energy around us in the ether allowing it to be channelled to the client.

The client will be asked to just lie down and relax in comfortable surroundings as the healer works around their body. Sometimes the healer will touch you in various places and at other times they won't.

A flow of energy can at times be felt, as well as the feel of more than one healer being in the room at the time. Most clients experience something and often results have been recorded.

You may feel complete relaxation and warmth or some pain and coldness—it is really dependent upon you. This can at times be very powerful as it works with intent, need and spiritual energy.

“Having been unable to move my neck, I got home and felt pain for the next two days. After this it completely went away and I have been able to move with complete ease”

“I could literally feel energy flowing through from my head down to my toes... I wondered how you could be holding my hand and my feet at the same time...”
