

TAROT READINGS

The tarot reader will ask you to shuffle a pack of tarot cards (there are a number of different ones - Karen uses the Ryder Waite version) which will then be dealt out in a certain layout.

Each card has its own meaning and the position of the card has a specific meaning too. The reader will not only talk to you about the card and the reason as to why it might be in this position, but will also give their own interpretation into this. This ensures your reading is not just a science but an intuitive insight as well.

Tarot has been used for a number of years to get people to look at their life from a different perspective and is still very popular today. It will look at you, your desires and aspirations, your environment and influences around you, what has gone before and what may be there in the future for you.

“Thank you so much for the reading, it was so spot on and accurate. Your interpretations of the cards were very interesting”

“That was one of the best tarot readings I have ever experienced. Your information was so exact and specific to what I needed to know”
